FOS FOS FOS FOS FOS!!!!

AMRE
FY Male

The song was too varied for me to do a Song Diagram

Common Name American Redstart
Latin Name *Setophaga ruticilla*

Date 4-24-07 Time 10:05-11am Weather 100% CC, LR
Location My house, Ringold, GA
Notes From the front porch, I heard a high pitched song. It was pretty variable, so I wasn't sure what it was. I went off the porch to go try to find it. I found it with ease, a FY Male AMRE! This is the first time I've seen a FY male! It was very cooperative allowing great views! It needed to work on its singing, but at least it held still! I got to observe it for about 40 mins, stayed in the area that kept I even got to observe it stretch its wings and tail! I didn't realize til later that I forgot to draw the feet. Unfortunately I didn't have enough room to do a detailed sketch so I just left it at a rough sketch.

Other birds of note:
YTVI - 1
NOWA - 1-5 day in a row!!!

WEWA

Here's the story of how I found the WEWA: I heard a group of CARWs scolding at something I went over to check it out. The CARWs attracted quite a group of birds, NOWAs and a WOTH, and... the quick appearing of the WEWA! Only a few seconds, then it was gone. I didn't find what was being scolded, but I was so happy about the WEWA!

LR for 1st time
Date 7-28-07 Time 6:20-7:30pm Weather 10-90% CC
Location My house, Ringold, GA
Notes There was a light rain when I first stepped out. It stopped pretty quickly, which then brought out a spurt of birds.
